

NICE ADDITIONS FOR THE NEW YEAR

COLLECTIBLE COINS:

1943 Bronze Lincoln Cent + 1944 Steel Lincoln Cent. Trophies of the highest caliber. The museum-worthy 1943 Bronze demonstrates pleasing golden-brown surfaces interrupted by "test cuts." As the 1943 Copper cent became an immediate sensation upon discovery—and today holds the lofty position of number 8 out of the top 100 coins—crooks immediately began to attempt to capitalize with nefarious methods to fool collectors. Graded as PCGS Genuine, this piece can best be described as having the details of Extremely Fine with a few scratches and trivial rim nick at 2:30 on each side. The 1944 Steel Cent is also graded PCGS Genuine and has the details of Extremely Fine with some environmental damage. The granular surfaces are consistent with original circ steel cents. This perfect penny pair is what some collectors spend a lifetime dreaming of. Please contact us for pricing, availability, and to receive high-resolution images of this high six-figure pairing. *Interest-free terms available.*
